PIVOT RIDGE

| SPECIALIST EQUIPMENT HIRE

Business Overview

Pivot Ridge Pty Ltd is a South Australian specialist-equipment hire business being established to supply a professionally managed dry-hire solution for mining, civil, maintenance and infrastructure projects. The initial operating model centres on a combination hydro vacuum / pressure truck, supported by structured asset management and direct owner oversight.

WHAT WE PROVIDE

- Specialist dry hire of combination hydro vacuum / pressure equipment.
- Clear equipment handover, condition reporting and return processes.
- Planned maintenance coordination and responsive defect escalation.
- Commercial terms designed for project, shutdown and retained-capacity discussions.

OUR OPERATING PRINCIPLE

- The asset is supplied dry hire only unless a separate written arrangement is agreed.
- The client controls work scope, operators, permits, inductions and site supervision.
- Site-specific technical, insurance and compliance requirements are confirmed before mobilisation.
- No material or task is accepted outside approved truck limits, lawful waste pathways or agreed site controls.

Proposed Equipment Capability

PR-001 is intended to provide flexible specialist equipment capacity for the following work scopes, subject to confirmed asset specification, client requirements, operator competency and site approval:

CIVIL & UTILITIES

Hydro excavation, non-destructive digging and service-proving support.

MAINTENANCE & SHUTDOWNS

Pit, bund, drain, wash-bay, slurry and clean-out support where compatible with the equipment and approved waste pathway.

PROJECT SUPPORT

Washdown, recovery, dewatering and specialist site-support activities within the agreed work pack.

Why Pivot Ridge

DIRECT OWNER ACCESS

A director-led business, providing a single accountable point of contact.

ASSET DISCIPLINE

A planned approach to pre-starts, defects, scheduled servicing and records.

CLEAR RISK ALLOCATION

Dry-hire obligations documented before the truck enters a work front.

CLIENT-READY DOCUMENTATION

A structured compliance-file approach for onboarding and due diligence.

FLEXIBLE COMMERCIAL DISCUSSION

Suitable for project, shutdown, retained-availability and longer-term hire conversations.

NO OVER-PROMISING

Site-specific mobilisation is subject to final contract, purchase, insurance and technical approvals.

Before any mobilisation, Pivot Ridge will complete an asset-specific onboarding process. This process is designed to give prospective clients and financiers confidence that the proposed asset is supported by verified documentation rather than assumptions.
